

DAILY REPORT

Name: somesh saini

Date: 2/06/2026

Designation: Software Developer

ACTIONS

1. Visa process Page Enhancement

- Updated `visa-process /page.js` to dynamically display data from API
- Added loading states and error handling
- Integrated API response data with static fallback data
- Set current step based on API's `currentStep` field
- Added progress percentages from API for steps 1 and 3

2. Visa Processing List Page

- Created `visa-processing/page.js` to show all visa applications
- Implemented statistics cards (total, in progress, completed, approved, pending)
- Added search functionality (by Application ID, Country, Course)
- Added filters (status filter, country filter)
- Added sorting options (by date, step, progress, application ID)
- Created detail modal to view complete application information
- Integrated with `/visa/my` API endpoint

3. Visa process Edit Page

- Created `visa-process /edit/page.js` with comprehensive editing capabilities

- Added tab navigation (Basic, Page, Banner, Sections)
- Implemented section overview details for all 6 steps (each step has its own custom details)
- Added file upload functionality in banner with:
 - File selection
 - Upload progress indicator
 - File URL storage
 - Download/view link for uploaded files
- Integrated with GET `/visa/:id` and PUT `/visa/:id` APIs
- Added real-time preview of changes
