Designation: Software Developer

ACTIONS

1. Visa Processing Page (Admin/Counsellor Panel) ✓

- Created a new fallback step component for cases where visa step data is unavailable or pending.
- Implemented a yellow-themed pending banner to indicate that a step has not yet started.
- Added step information section with requirements and estimated processing timeline (2–4 weeks).
- Developed a required documents table with document status and upload functionality.
- Added a comments section for counsellor-user communication and query management.
- Integrated support contact options including phone, email, and live chat.
- Implemented a separate completed-step UI to display completed visa processing stages.

2. Visa Processing Page (User Panel) ✓

- Converted the visa processing page into a fully dynamic interface.
- Implemented dynamic rendering of visa journey steps based on API data.
- Added support for dynamic banners, status updates, and step-specific content.
- Integrated document requirements and upload status for each visa step.
- Connected comments and communication sections with step data.
- Added dynamic handling for pending, in-progress, and completed step states.
- Improved overall responsiveness and user experience across devices.
